

House Sound & Electrical Equipment

The cost of the house sound system is included in the rental fees for the auditorium. For most lectures and simple sound system needs, the CCT light operator can operate the sound at no additional charge. Concert sound or other more sophisticated sound needs are encouraged to contract with a separate sound operator. Open House staff can recommend sound suppliers in the area.

Equipment

- Telex Radio COM 300 wireless communication system with 4 belt packs and headsets (single ear and microphone boom). Base unit in Light Booth. Licensee provides batteries. Each belt pack requires 6 AA batteries. This system is used for House and Stage Managers to communicate with light and sound operators, Green Room actors and so forth.
